# Specialized Environmental Products

BMP Supplies is a manufacturing company specializing in Erosion & Sediment control products for the construction industry.

# Specialized, sustainable, conscious, & innovated environmental products.

We deliver timely, competitively priced, and customizable options for our customers.

# Erosion Control Blankets

---

After 20 years as a leading Manufacturer for the Erosion Control Sector, BMP Supplies is excited to add Erosion Control Blankets to it's product line.

# Erosion Control Blankets

Our Rolled Erosion Control Blankets provide soil erosion protection and assist in the establishment of vegetation on moderate slopes or low-flow channel applications where loose mulches or bare-ground seeding are not effective. We will carry a variety of Erosion Control Blankets including short-term, extended-term, long-term photodegradable and 100% biodegradable.

# Turbidity Curtains

BMP Supplies manufactures various Turbidity Curtains including Type 1, 2, 3 with DOT compliant options. Stocked Curtains can range in depth between 2.5' - 12.5'. Customizable options are available for all curtains. These Curtains are able to meet the high demands of the construction industry with top of the line Erosion and Sediment control. Typically used in dredging & marine construction applications.

# Type 1 Industrial

BMP Supplies Type 1 Industrial Turbidity Curtains are manufactured to meet the demand for a low cost, high quality turbidity curtain. Manufactured using 8 oz. non-woven geofabric, BMP Supplies stocks multiple curtain sizes eliminating lead times as they are ready to ship immediately.

# Type 1 DOT

Our Type 1 DOT Curtains are manufactured to meet DOT approvals for curtains to be deployed in water with little to no flow rates. Made from 18 oz. PVC Coated material, the Type 1 DOT is durable and economic option for your project. This curtain is recommended for construction sites located in protected areas that are exposed only to light winds and to current velocities of less than one foot per second.

# Type 2 Industrial

The Type 2 Industrial Turbidity Curtains are manufactured to increase the overall strength of the curtain allowing for deployment in waters with higher flow rates. This Curtain includes top load cables, stress plates for reinforcing the corners, and Universal connector plates used to connect one section to another. The floats are covered with PVC Fabric and the skirt is manufactured using a woven fabric which allows for water to flow through the skirt while still filtering all soil and sediment.

## Type 2 DOT

The BMP Supplies Type 2 DOT Turbidity Curtain is manufactured with top load cables, stress plates for reinforcing the corners, and aluminum stress plate w/quick connector used to connect one section to another. Both the floats and skirt are manufactured using 18oz PVC Fabric.

## Type 2 DOT HD

The Type 2 DOT HD Curtains is our strongest Turbidity Curtain that is also Type 2 DOT compliant. This curtains has 22oz PVC fabric, an additional top tension cable, and 24" ASTM Universal Connectors in order to handle more severe conditions.

## Type 3 DOT

BMP Supplies Type 3 DOT Turbidity Curtains is a unique option that allows for medium flow through the filter fabric window. The Type 3 DOT Turbidity Curtain is manufactured with top load cables stress plates for reinforcing the corners, and quick connector plates used to connect one section to another. It is designed to handle more severe conditions such as inter coastal and tidal areas with higher water velocities.

## Oil Containment Boom

BMP Supplies Containment Booms are a versatile, general-purpose boom designed for use in many different spill response applications. The boom is manufactured using cylindrical foam flotation that is cost effective and offers high performance, reliability, and durability.

# Catch Basin Protection

---

BMP Supplies manufactures a wide variety of Catch Basin Protection products. BMP has a product to meet any need for Catch Basin and Curb Inlet Protection, ranging from BMP Supplies patented Catch Basin Donut to our Catch Basin Sack.

# Catch Basin Donut

BMP's Catch Basin claim-to-fame Donuts are designed to have the rainwater pond and filter into the catch basin near construction sites. Primary benefits of the catch basin include easy installation and even easier maintenance for your erosion control needs. Once the Donut is installed all that is required for

maintenance is the use of a broom or shovel to remove the collected sediment around the catch basin. The filter fabric wraps around the grate and is fastened with the belting and buckles attached. For areas of excessive rain a High Flow option is available.

## Catch Basin Log

BMP's catch basin logs have been field proven to be the best temporary protection for catch basins. They are manufactured in bright orange polyethylene fabric with yellow stripes for maximum visibility and filled with weed free kiln-dried wood shavings. This product takes just minutes to install; pop out the grate, surround the hole with the flap to the inside and reinsert the grate.

## Curb Inlet Filter

BMP's Curb Inlet Filter is a simple device used to protect the inlets from filling with soil and sediment. The 48" long curb inlet filter has two straps sewn to the side to allow for simple installation and removal. Often used in conjunction with a catch basin protection device, the two products work together to make a complete system of curb and inlet protection.

# Catch Basin Sack

The BMP Catch Basin Sack is a bright orange porous fabric bag that is fabricated with reinforcing, lifting, support and dumping webbing that is easy to see in all weather conditions. Our unique design keeps silt, sediment, and debris out of the storm system. The BMP Sack reduces the need to flush or clean inlets and is easy to maintain, install, and inspect. The CB Sack compliments the Curb Inlet filter for best possible protection.

## Drain Guard

BMP's Drain Guard is installed underneath Catch Basin grate to filter sediment filled rainwater running from your job-site. The rainwater and sediment fall into the catch basin and filter through the Drain Guard. They are very easy to use and maintain for any project. The BMP Supplies Drain Guards are manufacturing using 8oz Geofabric and are a very cost effective method of Catch Basin protection.

## Silt Sac

BMP's Silt Sac is installed underneath Catch Basin grate to filter sediment filled rainwater running from your job-site. The rainwater and sediment fall into the catch basin and filter through the Silt Sac. They are similar to the Catch Basin Sack however they are deeper, which allows them to hold more soil and sediment. They are very easy to use and maintain for any project.

# Erosion Control & Filtering

BMP Supplies provided premium Erosion Control products which include Ditch Checks / Dewatering Bags / Straw Wattles / Wire Back Silt Fence and more.

## Straw Wattle

BMP Supplies Straw Wattles are an effective and economical alternative to silt fence and straw bales for sediment control. Consisting of a superior UV-stabilized photodegradable synthetic netting made for high water flow and filled with 100% weed free straw. Straw Wattles are made to filter sediment flow in channels and slopes. BMP's most popular, 9" x 25' is shipped on a truck load with 26 total pallets.

## Biodegradable Straw Wattle

BMP's Biodegradable Straw Wattles are a quicker biodegradable option. These Wattles have a shorter life span for projects where the Wattle must biodegrade faster. Consisting of a green tubular knit natural biodegradable netting. The netting has additional UV-stabilizer along with an ECM Biodegradable agent. The Biodegradable Straw Wattles are made for high water flow and also filled with 100% weed free straw.

# Spring Berm

BMP Supplies Spring Berm is an expanding energy dissipater that reduces run-off and prevents the formation of rills or gully's in channels or highway ditches. Because of the compact nature of our berms, we are able to fit over 1600 lineal feet of product on one pallet. Our patented Spring Berms have been third party tested and their proven effectiveness has placed them on transportation authorities' list of approved products. The 12 inch diameter tubes are shipped compressed and buckled together.

## Spill Containments Berm

Designed to help with a wide variety of spill containment needs. These durable light weight berms can be easily rolled up and carried by hand to required locations. Perfect for quick containment under drums, tanks, tools and equipment. Flexible Foam walls allow for vehicles or forklifts to drive over the berms. Assortment of sizes available.

## Dewatering Bag

BMP's Dewatering Bag is used in applications where sediment laden water is being pumped. The pump hose outflow is attached into the dewatering bag opening. The water that escapes the bag will be filtered to the specification of the bag material. Various sizes available.
